RE: Docket No. 98N-1265

The MOU, as well as the compounding section 503A of the FDA Modernization Act, severely limits the practice of interstate distribution of compounded drugs and places further unnecessary restrictions on consumer choices and commonly accepted professional pharmacy compounding practices.

As a patient who suffered toxic reactions to a patented drug, I found blessed relief from a compounded prescription written by a doctor in another state and compounded by a professional pharmacy in yet another state.

The rights of physicians and patients to give and obtain health care products from the provider of our choice and the rights of compounding pharmacists to serve the public's medical needs must not be restricted!!
